

## **HOW to buy a Bassinet for a Newborn:**

There aren't that many purchases as important as this one. First, congratulations if in order. And be sure the crib or bassinet you select for your newborn meets all required safety standards. It is usually noted. It should most definitely be sturdy and durable. If you plan to be moving the crib or bassinet for optimum view, it's best to choose one with rolling casters to ease with maneuvering. You'll want to note the height, length and width of the space you have available to be sure it will fit where you want it to.

Some cribs come with a mattress and others do not, so note if you'll need to purchase one separately. Do you know how many drop sides you need? Don't forget to take that into consideration, in addition to ease of assembly, which is very important to some. After all that, the style, color and design of the crib or bassinet are up to mommy and newborn -- Hopefully both agree.

## **HOW to buy a Dehumidifier for Mold:**

Mold is a common problem for many households. It's bad for your health, so it's important to do something about it when you see it. It's vital to look for ways to solve it. Dehumidifiers are known to assist in the prevention of mold. Since Dehumidifiers help to remove moisture from the air, and mold is caused by moisture, they can be your first defense against mold. Dehumidifiers can hinder it from happening or keep it from spreading. Specifically look for one that runs quietly.

Dehumidifiers collect water from the air, so a large bucket capacity is advantageous to spend less time emptying it. Many models collect water in a sealed container, which is helpful in preventing contact while discarding the water. And some have automatic overflow protection to avoid leakage of any water. Energy efficiency is always good. Compactness and portability depend on your needs -- Look for one that's lightweight, if you'll be moving it from room to room. Since humidity can mean mold, Dehumidifiers denote anti-mold.
