

## **HOW to buy a Crock Pot for cooking Meat:**

Crock Pots also known as Slow Cookers are perfect for many kinds of meat, especially tougher pieces of beef. Meats cooked in a Slow Cooker will just fall apart, if cooked long and low. Crock Pots are very easy to use and convenient, since they don't require much attention. To find one that works for you, you'll first want to consider the available shapes, which are oval and round. Oval shaped Slow Cookers are thought to work better with certain cuts of meat -- However, large capacity round Crock Pots are often deep enough to accommodate most cuts.

To decide between the two, think about what you want to cook in it. Multiple temperature settings are essential to a Crock Pot; they provide more cooking options to its user. Programmability can be nice, but not usually a requirement, unless you're away from the house for long periods of time. It's best that the pot be removable and dishwasher safe. Some of the best meat can easily be made in a Slow Cooker. It's particularly impressive for making effortless Carnitas, or other shredded meats.

## **HOW to buy a Deep Fryer for cooking Chicken:**

There's no need to be afraid to use a Deep Fryer, since they are made to be safe and simple. It is important that the one you purchase be durable, since you'll be working with hot oil. An adjustable thermostat helps to keep oil at the right temperature, a key factor for perfect frying. Deep Fryers are particularly good for fried chicken, since the temperature is regulated, which makes it effortless. It's best to look for a larger capacity Deep Fryer if wanting to fry chicken, unless you just like wings -- Food capacity and depth should be reviewed and considered.

Most Deep Fryers have a removable basket, and some even have two, which can be significant when cooking items that require different cooking times. Speaking of time, timers on a Deep Fryer can be beneficial, especially when striving to make that perfect fried chicken. Some Deep Fryers even have a filtration system, if that's something you're interested in. Overall, it's best to get one that's uncomplicated and suits your particular needs.

## **HOW to buy a Coffee Maker for Travel Mugs:**

Not too many people these days have time to sit down in the morning to enjoy a good cup of coffee. Quite a few are getting their coffee out, thus spending more and saving less. Coffee Makers for travel mugs should be considered a saving money tip. Let's just call it, Tip 101 – Coffee Makers that brew fresh coffee directly into a travel is a treat, as well as a cost savings to those spending time and money getting coffee out each day.

Why make an extra stop when you can simply take good coffee with you? If you're looking for one, it's good to seek a Coffee Maker that's easy to use, effortless to clean, durable, and brews quickly. Some are even programmable. And there are a few sizes and styles to choose from. Coffee Makers specifically designed for travel mugs generally won't include a cup warming surface for obvious reasons – Although, some do have a carafe in addition to travel mugs. Some Coffee Makers can even make two travel mugs at once, which is great for a working couple on the go. It's a good investment.
